

BBR Horse Health Program

Entry Requirements: Negative Coggins and Veterinary Health Certificate/Letter

Vaccinations:

Annual - Tetanus; Rabies; West Nile; Eastern/Western encephalitis; Influenza.

Bi-annual; Rhino. Spring shots and fall booster.

Worming: Recommended quarterly; semi annual required. One application each year should have a tapeworm additive

This is a consensus derived from vets that would do what is best for all the horses on BTR. The annuals and worming in the spring will be done by end of May. The Bi-annuals and worming in the fall will be done by end of November. These are minimum requirements and we know most of you have a program for your horse or with your vet that is on going and more comprehensive. We will have a vet come in prior to final dates and do any horses that you want done at that time. How these requirements are done is up to the owners, if we can assist you in any way please let us know. Please let us know when your horses are done and what was done. By e-mail, phone Butch 321-0151, or leave a message at 322-5386. We realize that some of these cause problems or concerns for owners/horses. We are trying to keep track of health records on horses at the BTR, please let us know what you give your horse.
